

aires protégées
aider les gens à faire face
au changement climatique

protected areas
helping people cope
with climate change

áreas protegidas
ayudando a la gente a enfrentar
el cambio de climático

PACT 2020

Protected Areas and Climate Turnaround

Overall Goal

“Ensure that protected areas and protected area systems are recognised as an important contribution to climate change adaptation/mitigation strategies for biodiversity and human livelihoods”

PACT 2020

Project Purpose

“The conservation community formulates, adopts, promotes and pilots a united and compelling case and action plan for protected areas as a key part of climate change adaptation and mitigation strategies”

PACT 2020

Protected Areas and Climate Turnaround

++ many others, national govts, agencies etc

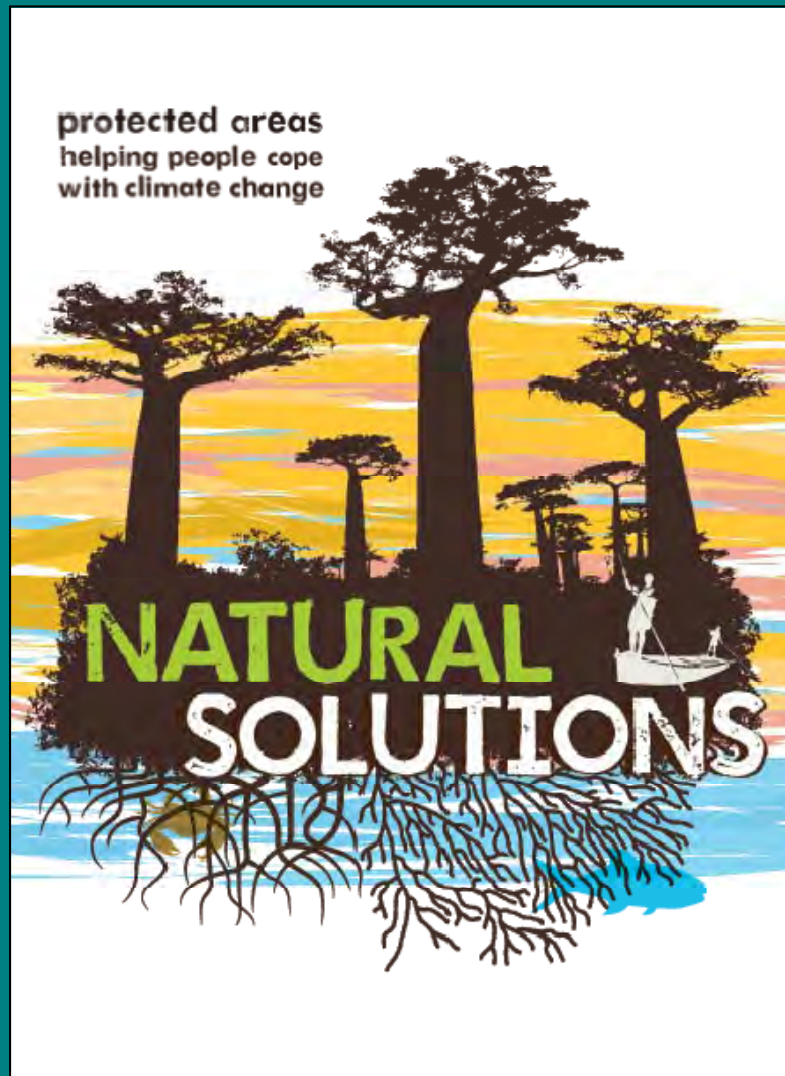

Situation analysis – articulating a compelling case

Policy action plan championed by IUCN and partners

**Guidance and development of regional,
national and local implementation programmes**

**A functional learning network
and communications platform**

Making the case

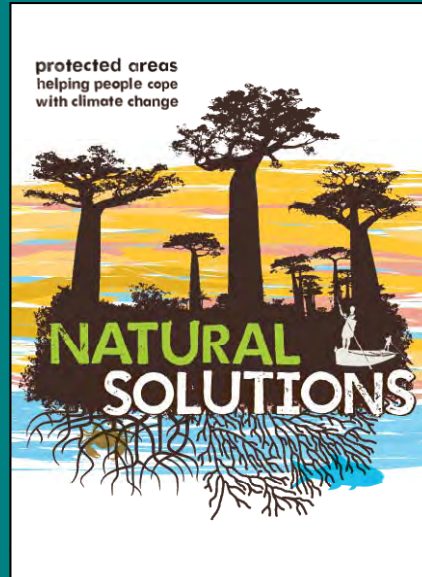

Granada November 2009

- **Celebrate** the 20th anniversary of protected area legislation in Andalucía, and provide technical and policy input for legislative review on protected areas and climate change.
- **Review and discuss** the findings of the publication “Natural Solutions” and plan follow-up actions.

Granada November 2009

- Demonstrate and compile further **case studies**
- Develop a **message** for Parties to the UNFCCC and to the CBD and other relevant policy instruments
- Develop a 5 year follow-up **programme for science, policy and practice** of protected areas in climate change mitigation and adaptation, and identify potential partners, roles and responsibilities.

ADAPTATION

- findings/insights
- key questions
- opportunities
- follow up actions
- implications
