Areas of expertise: Policy processes that interlink ocean and
climate change issues

Dorothee Herr joined IUCN's Global Marine Program as a Marine Program Officer beginning of 2009. Despite being native of land locked Luxembourg, Dorothee is particularly interested in policy processes on ocean and climate change. In her capacity at IUCN Dorothee is following in particular the current UNFCCC negotiations and working towards including marine and coastal issues more centrally into the international climate change policy debate. She is active in a wide range of marine related climate change topics and initiatives, including on ocean warming and ocean acidification as well as on nature-based solutions to climate change adaptation and mitigation. Dorothee is also the lead author of IUCN's publication on The Ocean and Climate Change. Tools and Guidelines for Action.

Dorothee received her masters degree in Environmental Change and Management from Oxford University and her diploma in Geography from the University of Heidelberg in Germany. Fluent in four languages Dorothee comes to IUCN with extensive experience within the private sector, government agencies and NGOs having worked amongst others at the Luxembourg Ministry of the Environment, Greenpeace and the International Network for Studies in Technology, Environment, Alternatives, Development (CEPS/INSTEAD).
