CIFOR (2004) Managing Landscape Mosaics for Sustainable Livelihoods.

Abstract: This paper, prepared by CIFOR, covers two sub-themes: enhancing conservation and development outcomes. How can a win-win situation be achieved between conservation and development? The authors suggest to do so by promoting the concept of payment for environmental services PES and by combining livelihood approaches and landscape analysis. For both sub-themes, the publication presents major projects in 2005, expected results, partners and users, and milestones for 2005.

Petrópolis Challenge: http://www.unep-wcmc.org/forest/restoration/globalpartnership/docs/Petropolis_Challenge.pdf

Abstract: As an output of the international workshop in Petrópolis, this document calls on the international community to restore forest landscapes to the benefit of people and nature, and to contribute to reversing trends of forest loss and degradation. The Petrópolis Challenge was presented to the United Nations Forum on Forests (UNFF5) in New York in May 2005.
