

## Species, status and population trend of Sturgeon on the IUCN Red List of Threatened Species™

Click on the species names below for detailed information:

<a href="#">Acipenser baerii</a> (Siberian Sturgeon)	Status: Endangered Population trend: decreasing
<a href="#">Acipenser brevirostrum</a> (Shortnose Sturgeon)	Status: Vulnerable Population trend: decreasing
<a href="#">Acipenser dabryanus</a> (Yangtze Sturgeon)	Status: Critically Endangered Population trend: decreasing
<a href="#">Acipenser fulvescens</a> (Lake Sturgeon)	Status: Least Concern Population trend: increasing
<a href="#">Acipenser queldenstaedtii</a> (Russian Sturgeon)	Status: Critically Endangered Population trend: decreasing
<a href="#">Acipenser medirostris</a> (Green Sturgeon)	Status: Near Threatened Population trend: stable
<a href="#">Acipenser mikadoi</a> (Sakhalin Sturgeon)	Status: Critically Endangered Population trend: decreasing
<a href="#">Acipenser naccarii</a> (Adriatic Sturgeon)	Status: Critically Endangered Population trend: decreasing
<a href="#">Acipenser nudiventris</a> (Ship Sturgeon)	Status: Critically Endangered Population trend: decreasing
<a href="#">Acipenser oxyrinchus</a> (Gulf Sturgeon)	Status: Near Threatened Population trend: increasing
<a href="#">Acipenser persicus</a> (Persian Sturgeon)	Status: Critically Endangered Population trend: decreasing
<a href="#">Acipenser ruthenus</a> (Sterlet)	Status: Vulnerable Population trend: decreasing
<a href="#">Acipenser schrenckii</a> (Amur Sturgeon)	Status: Critically Endangered Population trend: decreasing
<a href="#">Acipenser sinensis</a> (Chinese Sturgeon)	Status: Critically Endangered Population trend: decreasing
<a href="#">Acipenser stellatus</a> (Stellate Sturgeon)	Status: Critically Endangered Population trend: decreasing
<a href="#">Acipenser sturio</a> (Atlantic sturgeon)	Status: Critically Endangered Population trend: decreasing
<a href="#">Acipenser transmontanus</a> (White Sturgeon)	Status: Least Concern Population trend: stable
<a href="#">Huso dauricus</a> (Kaluga)	Status: Critically Endangered Population trend: decreasing
<a href="#">Huso huso</a> (Beluga)	Status: Critically Endangered Pop. trend: decreasing
<a href="#">Polyodon spathula</a> (Paddlefish)	Status: Vulnerable A3de Population trend: unknown

<a href="#">Psephurus gladius</a> (Chinese Paddlefish)	Status: Critically Endangered Population trend: unknown
<a href="#">Pseudoscaphirhynchus fedtschenkoi</a> (Syr-darya Shovelnose Sturgeon)	Status: Critically Endangered Population trend: unknown
<a href="#">Pseudoscaphirhynchus hermanni</a> (Dwarf Sturgeon)	Status: Critically Endangered Population trend: decreasing
<a href="#">Pseudoscaphirhynchus kaufmanni</a> (False Shovelnose Sturgeon)	Status: Critically Endangered Population trend: decreasing
<a href="#">Scaphirhynchus albus</a> (Pallid Sturgeon)	Status: Endangered Population trend: decreasing
<a href="#">Scaphirhynchus platorynchus</a> (Shovelnose Sturgeon)	Status: Vulnerable Population trend: decreasing
<a href="#">Scaphirhynchus suttkusi</a> (Alabama Sturgeon)	Status: Critically Endangered Population trend: decreasing
