

Partnerships for natural capital

Building bridges between business and NGO's

This master class will focus on the development of successful partnerships between businesses and nature organizations. Incorporating natural capital into your business processes requires detailed information about the impacts companies have on natural systems, the engagement of employees and the identification of smart and efficient ways to limit your impacts and dependencies on natural capital. This master class will offer insight in how companies and environmental NGO's can work together in finding solutions to these challenges.

Why attend?

- Discover all the expertise and services the environmental NGO sector has to offer.
- Get to know best practices of partnerships working on natural capital.
- Learn about partnership management for natural capital.

The master class will bring together leading experts, cutting edge case studies and senior decision makers from businesses and NGOs.
